

Professional Summary

Backend-focused software engineer with extensive experience building **scalable APIs, microservices, and AI-powered platforms** with **Node.js, Golang, and NestJS**. Delivered production systems for enterprise clients across Indonesia, Australia, Singapore, and Japan, with hands-on cloud (Azure, GCP, AWS), Linux Server, CI/CD, and **AI integrations** (OpenAI, Claude, Gemini, Local LLM).

Work Experience

Founder & Software Engineer **Hompimpa** **Mar 2026–Present**
Depok, Indonesia

Hompimpa is a software studio focused on delivering production-ready web, mobile applications with hardware integration and client solutions across multiple technology stacks.

- **Led cross-functional sub-teams** through full project lifecycles, conducted **direct client requirements gathering**, technical discussions, and stakeholder alignment to ensure on-time delivery of solutions aligned with business needs.
- Architected and delivered **production-ready web and mobile applications** using **Go, Node.js, NestJS, Next.js, and Flutter**, spanning **full-stack development**, designed scalable RESTful APIs, integrated databases, and consistently delivered features on time for **multiple client** projects.
- Owned **end-to-end CI/CD pipelines** via GitHub Actions and Docker, **reducing deployment cycle times by 40%** and ensuring **99.9% uptime** across all client infrastructure through proactive Linux server optimization.

Backend Developer **PT. Altimedia Cipta Visitama** **Jan 2024–Present**
Depok, Indonesia

PT. Altimedia Cipta Visitama is an Indonesian tech company delivering enterprise backend systems, AI-powered platforms, and ERP solutions for clients in Indonesia, Australia, and Japan, including collaboration with ProjectedAI.

- Designed high-throughput microservice architectures using **Golang, Node.js, NestJS, gRPC, and Protobuf**, **reducing inter-service latency by over 30%**.
- Built an **AI document intelligence platform** utilizing OpenAI APIs and HNSW vector databases to semantically process enterprise files.
- Integrated OneDrive, Google Drive, and Amazon S3 storage handlers, optimizing vector search capabilities to achieve **sub-second query response times** across thousands of documents.
- Engineered multi-tenant ERP backend modules and resolved complex external storage module dependencies to ensure **highly reliable data pipelines**.
- Managed Microsoft Azure cloud infrastructure, implementing auto-scaling and proactive cost optimization strategies that **reduced monthly cloud spend by 20%**.
- Collaborated with international partners across Australia and Japan, navigating cross-timezone technical handoffs and adapting to **strict enterprise delivery standards**.

Backend Developer(Campus, Part-Time) **PT. Telkom Indonesia** **Feb 2023 - Jul 2023**
Jakarta, Indonesia

PT. Telkom Indonesia is Indonesia’s largest state-owned telecommunications and digital services company, with over **150 million subscribers** and a workforce of over 25,000 employees, operating across telecommunications, internet, and digital ecosystem services nationwide.

- Developed and maintained **RESTful APIs and backend services** for an internal talent nurturing web portal, successfully supporting **300+ active enterprise users**.
- Managed server provisioning, environment configuration, and **production deployments** to ensure seamless application availability.
- Collaborated within a large Agile team, implementing **enterprise-grade code reviews** and production-level service monitoring.

Backend Developer(Campus, Part-Time) **Waithub** **Jul 2022 - Sep 2022**
Bandung, Indonesia

Waithub (formerly Antrique) is a Bandung-based tech startup specializing in **face-to-face service innovation**, offering a comprehensive suite of virtual queuing systems, time delivery analytics, targeted advertising, and secure payment services for businesses across Indonesia.

- Designed and developed a scalable **RESTful API in Golang** to power a virtual queuing, time analytics, and payment services platform.
- Containerized all backend services with **Docker** and deployed to **AWS via automated GitLab CI/CD pipelines**, achieving **zero-downtime releases**.
- Optimized API endpoints for **concurrent queue management** and real-time analytics, and successfully integrated secure payment modules.

Education

- **B.Sc. Computer Software Engineering (GPA: 3.78/4.00, Cum Laude)**, Telkom University, Bandung. Sep 2019 – Nov 2023

Technologies and Skills

- **Programming Languages:** Node.js, Golang, TypeScript/JavaScript, Dart (Flutter), Python
- **Backend & Architecture:** Microservices, NestJS, Express, Fastify, REST APIs, gRPC, Protobuf, GraphQL, WebSockets
- **Cloud & DevOps:** Microsoft Azure, AWS, GCP, Docker, GitHub Actions, GitLab CI/CD, Nginx, Linux Administration, PM2
- **Databases & Vector Search:** PostgreSQL, MySQL, SQL Server, Redis, MongoDB, Pinecone, Vector DB (HNSW)
- **AI & Integrations:** OpenAI API, Claude API, Gemini API, Hermes Agent, Amazon S3, Google Drive API, OneDrive API, Midtrans Payment Gateway, and Third-Party REST APIs
- **Frontend:** React, Next.js, Flutter, Tailwind CSS, HTML5, CSS3
- **Tools & Methodologies:** System Design, Agile/Scrum, Git, Swagger/OpenAPI, Postman, Code Review, Trello, Jira, Slack, Notion, Clickup, Portainer
- **Languages:** English (Professional), Indonesian (Native)

Achievements

- **Patent Holder: Telyukost** – Developed and secured a patent for a comprehensive online boarding search and ordering platform tailored for Telkom University students (2023).
- **1st Place Winner** – Unibi Technology Competition Regional Contest (2019).
- **3rd Place Winner** – Invofest National Technology Contest (2018).
